SYLVAROS™ DRS 42

Disproportionated Tall Oil Rosin Soap

The **SYLVAROS™ DRS-42** is a rosin soap which begins with catalytically disproportionated rosin derived from high-purity tall oil rosin. The disproportionation step converts abietic acid to the more oxidation-resistant dihydroabietic and dehydroabietic acid isomers. The extremely low abietic acid content ensures that DRS 42 soap is made from these rosin acids will not interfere with the catalyst-initiator system or polymer chain length during the polymerization of SBR rubber. When the resultant latex is coagulated by acidification, the free rosins remain in the polymer to impart better tack, higher tensile strength, superior heat resistance, and improved hysteresis characteristics.

SYLVAROS™ DRS-42 is a water-dispersible potassium soap with no electrolyte added.

PROPERTIES	TYPICAL	SPECIFICATIONS
Acid Value	11.8	10 - 14
Total Solids, %	80	78 - 82
Composition – Abietic Acid, % (by GLC)	0.4	0.7 Maximum
Composition – Chlorides, % (as NaCl)	0.1	0.2 Maximum
Viscosity, cps, 65C	1,500	
Viscosity, cps, 75C	800	
Viscosity, cps, 80C	500	
Weight Per Gallon, 65C, lb./gal	9.16	
Flash Point, Open Cup, C (F)	>204 (>400)	

Safety Information:	Please refer to the individual Material Safety Data Sheet #553 .
Available Forms/Packaging:	High-solids paste in tank car. Molten in tank truck. Paste in lined (open-head) drums (net 485 lb).
Shipping Point:	Panama City, Florida
DOT Shipping Classification:	Non-hazardous.
Suggested Applications:	Emulsifier in SBR polymerization.

SYLVAROS™ DRS 42

Disproportionated Tall Oil Rosin Soap

Food and Drug Administration Coverage:

SYLVAROS™ DRS-42 meets the ingredient requirements of the following sections of the Code of Federal Regulations, Title 21 when used according to the regulations and any limitation that may apply:

175.105	Adhesives
175.125(b)	Pressure Sensitive Adhesives. Applications to raw fruit and raw vegetables only.
176.170(a)	Components of Paper and Paperboard in contact with Aqueous and Fatty Foods. May exempt extractive limitations according to provisions of 176.170(a).
176.180(b)(1)	Components of Paper and Paperboard in contact with Dry Foods [by cross reference to 176.170(a)]. May exempt extractive limitations according to provisions of 176.170(a).
176.200	Defoaming Agents used in Coatings.
176.210	Defoaming Agents used in the Manufacture of Paper and Paperboard.
177.1200	Cellophane.
177.2600	Rubber Articles intended for repeated use.
177.1210	Closures with Sealing Gaskets for food containers. Use only in resinous and polymeric coatings on metal substrates.
178.3120	Animal Glues.
178.3970	Rosin and Rosin Derivatives

Method of Analysis: Consult Bulletin No. 6134

"Methods of Analysis for Arizona Chemical Company Tall Oil Rosin Products."
